

# Cycling

This article is part of a series produced by the British Council to help you learn English and learn about different Olympic and Paralympic sports.

Find out more about the four different kinds of Olympic cycling events.

## QUESTIONS AND ANSWERS

**I've been trying to understand the Olympic track cycling programme – it's very confusing.**  
Yes, it does seem complicated – there are five different events.

**Five! Why so many?**  
Simple! They're all different. There's the team pursuit, the team sprint, the individual sprint, the keirin and the omnium.

**One at a time, please! What's the team pursuit?**  
Two teams of four riders each start on opposite sides of the track and try to catch one another or finish in the fastest time.

**OK, sounds like what my big brother used to do to me when he found out I'd borrowed his stuff! What about the sprints?**  
Riders race against each other over three laps of the track.

**Right, we used to do that when we were kids too. And the keirin? That sounds like a Japanese beer.**  
Well, it did originate in Japan. It's pronounced 'kay-rin'. Riders compete in a sprint after riding behind a motorcycle.

**Behind a motorcycle? Why?**  
To get them going faster. By the end the cyclists are travelling at more than 50 km/h.

**Wow! We certainly didn't do that when we were kids! Definitely no chasing motorcycles!**  
I should hope not.

**What about the omnium? It sounds like a science fiction movie!**  
Well, it's like cycling's version of the decathlon – except there are six events instead of ten.

**My head is hurting again. Are they the same as you explained before?**  
No, though there is an individual pursuit. There's also the flying lap, the points race, the elimination race, the scratch race and the time trial.

**Hmm. Why don't I... why don't I research that by just watching them on TV?**  
Good idea.

## ACTIVITY

Match the event to the definition.

- Riders start on opposite sides of the track and try to catch one another or finish in the fastest time.**  
A. Keirin  
B. Omnium  
C. Sprint  
D. Pursuit
- Riders race against each other over three laps of the track.**  
A. Keirin  
B. Omnium  
C. Sprint  
D. Pursuit
- Riders compete in a sprint after riding behind a motorcycle.**  
A. Keirin  
B. Omnium  
C. Sprint  
D. Pursuit
- Riders compete in six different events.**  
A. Keirin  
B. Omnium  
C. Sprint  
D. Pursuit

## RULES FOR CYCLING

- There are four different cycling sports on the Olympic programme: track, road, mountain bike and BMX.
- Track cycling is held in an indoor stadium called a velodrome. There are five Olympic track cycling events for men and women: team pursuit, team sprint, individual sprint, keirin and omnium.
- There are two road cycling events for both men and women. In the road race, all competitors start together. The first rider to finish wins gold. In the time trial, the riders start 90 seconds apart. The winner is the rider with the fastest time.
- There is one mountain bike race each for men and women. The race takes place on an outside course in rough and hilly countryside. All riders start together and must complete a number of laps of the course. The first rider to finish wins the gold.
- There is one BMX race each for men and women. The race takes place on a short outdoor track that includes bumps, jumps and difficult corners. BMX bicycles are different with smaller wheels and only one gear and one brake.
